

# CONSPEC®

INNOVATION THAT DIGS DEEPER.

## OIL & GAS

For over 55 years, Conspec has been supplying reliable gas, flame, and heat detection systems worldwide. Many companies across various industries rely on Conspec solutions in diverse applications. Conspec is internationally recognized as a leader in the design, development and manufacture of gas detection instruments, monitoring, and control systems.

### CX0503-MIR LEL Detector

- Eliminates sensor “drift” caused by changes in temperature and humidity
- Not susceptible to fluctuations in power and power spikes
- Remote sensor capable with remote sensor calibrations

### CN & CX Series Gas Detectors

- Conspec’s most affordable solution for toxic gas detection
- Single gas detection solution for over 100 different types of gases
- Remote sensor capable - up to 100ft

### OPTIO XP Multi Gas Detector

- Reduces cost of purchasing multiple units
- Up to 6 sensors
- Remote sensors up to 100ft

### OPTIO XP Wireless Multi Gas Detection System

- Perfect for perimeter monitoring
- Reduces installations costs removing conduit and wire
- Easily deployable

### D371 (3) IR Sensor & UV Sensor Flame Detector

- Reduces downtime with highest immunity to false sources
- Eliminates the need for expensive test lamp with self test features
- Notifies when lens is blocked from dirt or debris
- Laser sighting tool to see coverage area

### Optical Beam Smoke Detector

- Complies with ATEX
- Allows for 2 detectors per system controller
- Programmable sensitivity and fire/fault delay

### Personal Gas Detector

- Eliminate nightly charging with up to 4 months battery life on one charge
- Hibernate mode on H2S allows for up to 3 years life
- Calibration dock station for hands-off calibrations

### Linear Heat Detection Cable

- Finds hotspots before fire breaks out
- Use in addition to flame detection for maximum protection
- Easy to install

### Calibration Kits w/ Remote Calibration Capabilities

- Conspec Controls calibration gas kits include a weatherproof carrying case, zero & span calibration gases, plastic tubing, calibration adapter, and two pressure regulators. Remote calibration options available.

### Alarming Devices (Horns / Strobes)

- All shapes, sizes, and colors
- General purpose and for classified areas
- Horn and strobe combination units available

### Thief Hatch Access Safety System - THASS

- Open tank hatches from ground level
- Monitor levels of escaping gas
- Easy to Install and maintain

### Thermal Imaging Identify

- The hottest (or coldest) spot in the image
- Collect and analyze temperature information over a wide target area
- Small sized rugged camera with motorized focus
